

CARPENTRY LEVEL II

2017-18

Class Meets: Monday - Friday
Class Time: 8:00 am to 3:00 pm

Instructor: Clayton Snodgrass
1050 hours - 9 months

Move beyond the basics of residential construction in this second level carpentry course. Carpentry Level II combines on-the-job training with advanced construction theory and hands-on skills in order to prepare students to work as a professional in both residential and commercial job sites. Carpentry Level II is more work-based than theory, so the instructor will focus on continuously assessing the level and quality of the students' skill attainment throughout this training. The students will receive constructive feedback and ample opportunities to hone their skills, especially while they build a house on site or do live construction projects for both internal and external customers. Project planning, scheduling, estimating, and management are all aspects of becoming a Construction Crew Leader; therefore, improving critical thinking, effective communication, and teamwork, as it relates to dealing with supervisors, co-workers and customers, will also be a main focus of this training as students prepare to transition from job-related training to industry work. Students will have the opportunity to compete in the Career and Technology SkillsUSA student organization competition in either framing or cabinet making at the regional, state and national levels.

Tuition		\$ 1,575.00
1st Semester	\$ 787.50	
2nd Semester	\$ 787.50	
<small>Tuition is paid on a semester basis and is prorated for late entries and half day students.</small>
